KARTIK SHARMA

CYBERSECURITY ANALYST | SECURITY ENGINEERING
Bengaluru, India | +91 70151 23001 | kartiksharma15.07.2004@gmail.com
https://www.linkedin.com/in/kartik2004sharma/ | https://github.com/Kartik2004sharma

SUMMARY

Cybersecurity-focused Computer Science student with international research experience in secure full-stack development, smart-contract review, authentication, role-based access control, Linux, networking fundamentals, and systematic defect analysis.

EDUCATION

Chitkara University, Punjab, India **Aug 2023 – Aug 2027**
Bachelor of Technology in Computer Science and Engineering | CGPA 8.80/10 | No backlogs
Relevant coursework Computer Networks, Operating Systems, Data Structures and Algorithms, Software Engineering, Database Systems

TECHNICAL SKILLS

Security Smart-contract security review, authentication, role-based access control, secure transaction flows, vulnerability review, test-case design
Systems and networking Linux and Unix command line, shell scripting fundamentals, operating systems, computer networks, TCP/IP fundamentals
Programming C, C++, Python, JavaScript, TypeScript, SQL, Solidity
Frameworks and data React, Next.js, Node.js, Express, REST APIs, MongoDB, MySQL, PostgreSQL, Firebase
Tools and practices Git, GitHub, Jest, Playwright, Lighthouse, Agile Scrum, debugging, technical documentation

EXPERIENCE

Pazcare | Employee Benefits Manager **Aug 2026 – Present**
Bengaluru, India
- Manage time-sensitive employee-benefits workflows in a technology-led healthcare and insurance environment, verifying requests and coordinating clear resolutions across customers and internal stakeholders.
- Apply structured issue triage, documentation, and customer communication to reduce ambiguity across operational handoffs.

Providence University | Research Intern, TEEP Scholarship **Sep 2025 – Dec 2025**
Taichung, Taiwan
- Built and debugged a full-stack counterfeit-detection research platform combining deep CNN models with blockchain; resolved 30+ functional issues through documented test-and-fix cycles.
- Developed 20+ reusable components and optimized the deployed platform to a 95+ Lighthouse score while collaborating in Agile sprints with researchers, designers, and backend engineers.

PROJECTS

AgentPay | *Next.js, TypeScript, Solidity, PostgreSQL*
- Engineered governed AI-agent payments with owner-defined spending policies and smart-contract vaults that constrain payment authority on Arbitrum Sepolia.
- Implemented auditable payment receipts and traceable transaction records to support authorization review and operational accountability.

VerifyChain | *Next.js, Solidity, Web3.js, IPFS*
- Designed decentralized product-verification logic using Ethereum smart contracts, IPFS storage, and QR-based validation for tamper-resistant supply-chain records.
- Audited contract logic and optimized gas usage, reducing transaction costs by 30% while strengthening validation and failure handling.

CardFi | *Next.js, TypeScript, Solidity, wagmi*
- Built a wallet dashboard combining account activity, USDC vault controls, spending insights, and cross-chain tools in a single responsive interface.
- Structured smart-contract interactions and transaction-state feedback so users could review wallet actions before execution and verify resulting states.

ResearchShield | *Next.js, TypeScript, MongoDB*
- Created search and filtering across 5,000+ conference and journal records with algorithmic credibility scoring and acceptance-rate analytics.
- Designed an authenticated application layer, REST API query logic, and normalized data model, achieving a 95+ Lighthouse performance score.

CERTIFICATIONS AND ACHIEVEMENTS

Relevant credentials Networking Fundamentals — Akamai Technologies | Operating Systems Virtualization — Codio | Cloud Computing Specialization — UIUC
Achievements Top Performer, TechAbhivakti 2.0 | Hacktoberfest 2024: 200+ open-source pull requests and five quality badges
